

National Railway Museum — Derby Registers

Midland Railway Society

Introduction

Six volumes make up the Derby Registers. There are five books labeled Books 1 to 5 with a sixth book simply labeled as Non-Wholeplate. The negatives are numbered sequentially, though there is a break in the numbering in Book 1. The table below should make the numbering sequence clear.

The Registers span from the middle years of the Mid-

land Railway up to the early years of British Railways. The Midland negatives are contained in Book 1 and the Non-wholeplate book and end around number 13000.

Some entries in the books (especially the Non-wholeplate book) were never assigned to a negative and therefore large gaps appear in the numbering sequence.

Volume	Dates (approx)	Negative numbers
Book 1	1882 – 1929	1–3000, 8793–15800
Book 2	1929 – 1939	15810–25456
Book 3	1939 – 1944	25457–32360
Book 4	1944 – 1950	32361–39260
Book 5	1950 – 1954	39261–42370
Non-wholeplate	Various	3001–8353, R57/117 – R59/56
